

KNOWLEDGE SHARING ZONE

GMS: Towards inclusive, safe, and sustainable agriculture value chains

KNOWLEDGE SHARING ZONE: EXPLORING THE CASP LOA INITIATIVES

The Knowledge Sharing Zone is dedicated to promoting the successes, lessons and policy implications of the wide-ranging subprojects implemented through the Letter of Agreements (LOAs) under the Greater Mekong Subregion Core Agriculture Support Program (GMS CASP).

The LOA initiatives provide a broad spectrum of innovative models and science-based insights for strengthening and promoting inclusive, sustainable and safe small-scale agriculture in the GMS.

The LOAs include approaches and models that empower women in agriculture, bolster smallholders and SMEs, minimize greenhouse gas emissions, support sustainable improvements in productivity, reduce losses and waste in supply and, most importantly, demonstrate inclusive and sustainable methods of increasing smallholder incomes from agriculture.

The implementers themselves have developed this series of informative posters to share their most notable achievements and the knowledge they have generated. Project implementers will be available to answer questions and provide even more insight from their work over the coming days. Come and introduce yourself!

ROUNDTABLE DISCUSSIONS

Open dialogue sessions relating to the work of the LOAs and other CASP activities be held at the times over the coming days.

These frank discussion sessions will address some of the key successes, challenges and opportunities for developing a more inclusive, safer and more sustainable agriculture sector in the GMS.

The sessions will bring together stakeholders from around the subregion to map out some of the next steps to continue the development of the GMS agriculture sector. The outputs will include new approaches to combining, replicating and scaling initiatives from the LOAs and related activities around the GMS through future projects, policy change and investment.

You'll find the schedule for the roundtable discussions posted in the Knowledge Sharing Zone or please ask a CASP staff member for more details.
